Laboratory Medicine Research Retreat
Tuesday 10.24.2017  TAC Auditorium

Schedule
Morning:
8:30 AM  Coffee/light breakfast
8:45  Welcome Brian Smith

Chair: Nadia Ayala-Lopez
9:00 -9:30  Diane Krause  Potential role of cell cycle in hematopoietic fate decisions
9:35 -9:50  Chris Tormey  Exploring the immunogenicity of blood group antigens
9:55 -10:10  Jeanne Hendrickson  Immunoprophylaxis against RBC antigens: success and failure
10:15-10:30  David Peaper  EMR-assisted reflex urine cultures: improving test utilization in the emergency room
10:30-10:50  Break

Chair: Rekha Rai
10:50-11:20  Sandy Chang  How telomere binding proteins repress the DNA damage response
11:20-11:50  Tore Eid  New roles for glutamine synthetase in health and disease
11:50-1:00  Lunch  In TAC

Afternoon
Chair: David Gibbs
1:00-1:15  Alexey Berseney  Isolation of tumor-reactive cells for cell therapy of melanoma
1:15-1:45  Stephanie Eisenbarth  To B or not to B: the role of dendritic cells in Tfh cell priming
1:45-2:15  Ellen Foxman  Using innate airway defense mechanisms to fight and diagnose respiratory infections
2:15-2:30  Joe El-Khoury  SDMA as a marker of kidney function
2:30-3:00  Richard Torres  Direct-to-digital: a new paradigm for histology
3:00-4:00  Poster Session + Coffee

4:00 – 5:00  Keynote Speaker - Dr. Manon Cox, CEO of Protein Sciences
5:00-6:00  Reception
